

## Introduction meeting Agenda:

1. Introduction to the company and its values
2. Overview of the internship flow and expectations
3. Discussion on the Major Requirements of the internship
4. Detailed explanation of the tasks and projects you'll be working on

## Internship Flow :-

This one-month internship is divided into two phases :

### Phases 1 :- Week 1: Skills Test

- Interns are assigned various tasks related to their domain.
- The tasks serve as a skills test to assess their existing abilities and identify areas for improvement.
- Interns are expected to complete the assigned tasks within the week.

### Phases 2 :- Week 2, 3, and 4: Live Projects

- After the skills test, interns are assigned live projects relevant to their field of expertise.
- Interns work on these projects under the guidance of mentors or supervisors.
- To progress to the second phase of the internship, successful completion of Task 1 is mandatory.

**Detailed explanation of the tasks that you have to complete in the 1st week:-**

**Full Stack Week 1 Task:**

- ❖ **Task:** Build a Simple Quote of the Day website.
- ❖ **Description:** Build a Quote of the Day that will show users random quote from the API
  - Allow users to search for quotes by author name
  - Implement both front-end and back-end functionalities, including user interface design & data storage
  - Build the web app with a responsive user interface
- ❖ You are free to use any programming language, framework and database.
- ❖ Note: If you are using any framework please don't use the built-in registration system.
- ❖ Create a github repo with the name "Techplement", inside that repo create a folder week1-tasks where you have to upload your files.

**Please note that failure to complete the assigned task within the specified timeframe may result in the termination of the internship.**

**Note : Last date to submit the task is 08/01/2025. We will inform you about where & how to submit tasks on submission day.**

**Thank You**

**All The Best**
